TP Basic Marine

The new temperature calibrator is on board.

Smaller // lighter // technically better

For easier handling on the high seas

New calibrator model

In 2023 we present our new calibrator model TP Basic Marine, optimized for the requirements and conditions in the marine market.

Highlights

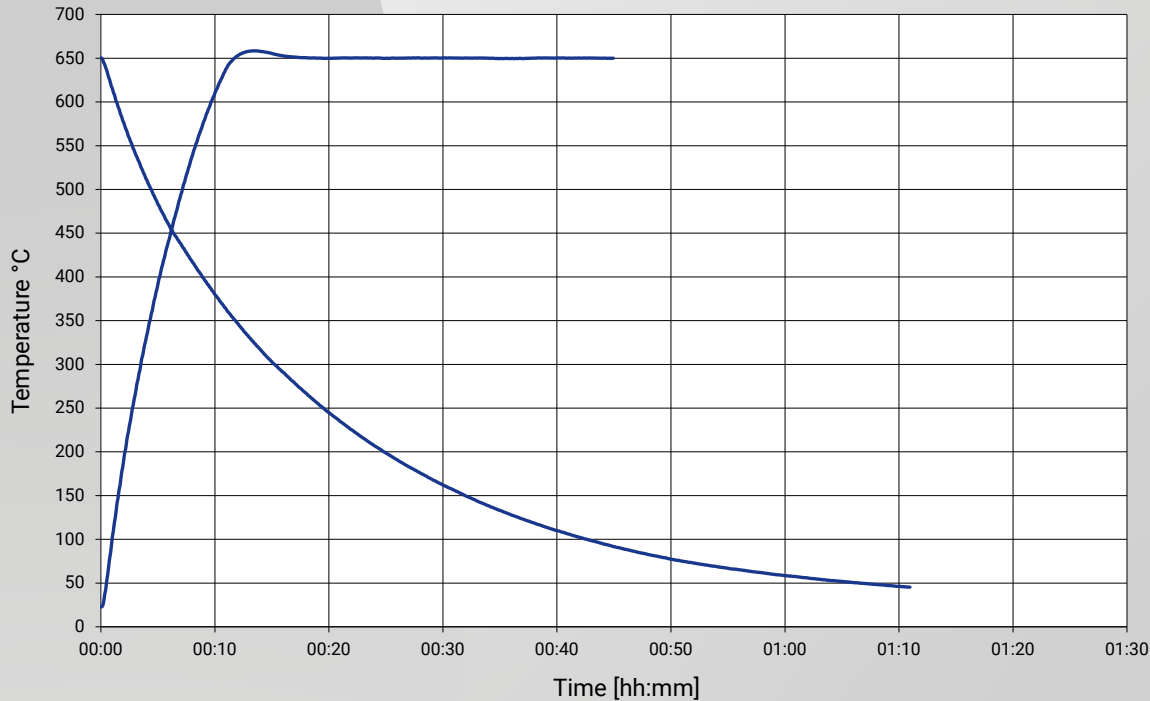

- Simplified display - all important functions - even easier to use
- Small block with high speed
- Carrying bag as a practical accessory
- Particularly small calibration inserts
-> cost savings on accessories
- Calibrations up \varnothing 13 mm sensors possible
- DNV approval pending

Calibration insert !

Get there faster

Speed up your workflow with even faster calibration processes thanks to **optimised heating and cooling times.**

Reliable calibration with SIKA

SIKA developed the first dry block temperature calibrator and made it ready for series production as early as the beginning of the 1980s. Over the years, our portfolio has steadily evolved. In the meantime, we offer temperature calibrators for all calibration tasks.

We have not lost our innovative spirit and passion for calibration instruments over the years: we strive to make our products a bit better every single day.

Do you want to know more about our temperature calibrators? Simply visit our website at www.sika.net or use the QR code on the right.

We look forward to seeing you!
